## About us

### History

We are looking back on a long tradition in steel construction.

The history of our company starts in the early 1950s; main purchaser of the steel constructions were the Soviet Union and the Federal Republic of Germany.

The Stahlbau Lüttewitz-Rosswein GmbH was established in 1990; since 1994 the company has been led by Mr Hyrum Alius as main shareholder and director.

In the following years the company has been modernized, restructured and repositioned at the market by substantial investments.

Today the 80 employees of our company serve a growing market throughout the EU.

### Vision

Versatility is our strength.

Economic success and wide professional competence of our team motivate us to extend our business activities.

At present the creation of value by our company is made up by three business segments:

- steel construction – our core competence
- aluminium construction
- plastics construction

Processing of orders from acquisition to mounting is carried out completely by own employees in our departments:

- cost accounting and distribution
- technical office
- process engineering
- production
- project management and mounting

Our integrated quality management is certified in accordance with ISO 9001:2000.
